Contents of Volume 281

Vol. 281, Nos. 1–2 **September 25, 2003**

Special Issue: Recent Advances in Aquifer Hydraulics and their Applications to Aquifer and Vadose Zone Characterization, Remediation, and Dewatering

Preface
H. Zhan and V.A. Zlotnik 1
Use of time–subsidence data during pumping to characterize specific storage and hydraulic conductivity of semi-confining units
T.J. Burbey 3
Temporal and spatial (down profile) variability of unsaturated soil hydraulic properties determined from a combination of repeated field experiments and inverse modeling
G.A. Olyphant 23
Steady-state analysis of cross-hole pneumatic injection tests in unsaturated fractured tuff
W.A. Illman and S.P. Neuman 36
The non-invasive characterization of pumping-induced dewatering using ground penetrating radar
M.J. Bevan, A.L. Endres, D.L. Rudolph and G. Parkin 55
Detrimental effects of natural vertical head gradients on chemical and water level measurements in observation wells: identification and control
A. Elçi, G.P. Flach and F.J. Molz 70
Estimation of hectare-scale soil-moisture characteristics from aquifer-test data
A.F. Moench 82
Stream depletion predictions using pumping test data from a heterogeneous stream–aquifer system (a case study from the Great Plains, USA)
S.J. Kollet and V.A. Zlotnik 96
Estimation of hydraulic conductivity from borehole flowmeter tests considering head losses
V.A. Zlotnik and B.R. Zurbuchen 115
Horizontal well hydraulics in leaky aquifers
H. Zhan and E. Park 129
Hydraulics of horizontal wells in fractured shallow aquifer systems
E. Park and H. Zhan 147
Theoretical and experimental studies of coupled seepage-pipe flow to a horizontal well
C. Chen, J. Wan and H. Zhan 159

Vol. 281, No. 3 **October 1, 2003**

Regular Papers

The mechanism of Lake Kinneret salinization as a linear reservoir
A. Rimmer 173
Poroelasticity: observations of anomalous near surface tilt induced by ground water pumping
M. Fabian and H.-J. Kümpel 187
Towards estimation of extreme floods: examination of the roles of runoff process changes and floodplain flows
C. Jothityangkoon and M. Sivapalan 206
Estimation of regional meteorological and hydrological drought characteristics: a case study for Denmark
H. Hisdal and L.M. Tallaksen 230

PII: S0022-1694(03)00355-X

Vol. 281, No. 4 **October 20, 2003**

Special Issue: Stochastic Inversion in Hydrogeology

Preface
J.E. Capilla and J.J. Gómez-Hernández 249
Geostatistical inversion of coupled problems: dealing with computational burden and different types of data
A. Medina and J. Carrera 251
Non-uniqueness of inverse transmissivity field calibration and predictive transport modeling
S.A. McKenna, J. Doherty and D.B. Hart 265
Coupled inverse modelling of groundwater flow and mass transport and the worth of concentration data
H.-J. Hendricks Franssen, J. Gómez-Hernández and A. Sahuquillo 281
Inversion of dynamic production data for permeability: fast streamline-based computation of sensitivity coefficients of fractional flow rate
X.-H. Wen, C.V. Deutsch and A.S. Cullick 296
Stochastic delineation of capture zones: classical versus Bayesian approach
L. Feyen, P.J. Ribeiro, F. De Smedt and P.J. Diggle 313
